## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 29 and 30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is no antecedent basis for the "circuit board" recited in the claims.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 26, 27 and 31 are rejected under 35 U.S.C. 102(b) as being anticipated by Ross.

There is disclosed in Ross an electrical kitchen appliance, comprising: a housing 18, 19, 20; an electrical motor 1 including an edge (outer motor wall surface); a cylindrical motor mount 8 disposed within the housing and including: opposed open ends for receiving the motor; a "flexible" wall; and detents (screws) 9 disposed on the wall and projecting radially inwardly, the detent (screws) engaging the edge to retain the motor within the motor mount

In regards to claim 31 there is no structure to define the device as a fruit press.

***Allowable Subject Matter***

Claim 28 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 2-5, 7, 9, 10, 16, 18, 20, 24 and 25 are allowed.

***Response to Arguments***

Applicant's arguments filed 07 March 2006 have been fully considered but they are not persuasive. Applicant argues that the prior art fails to disclose the subject matter as claimed in claim 26. A view of the rejection above gives a complete account of which elements of the prior art relate to those claimed.

In regards to the term "flexible", it is evident that the metal forming the motor mount has some degree of flexibility. And the recited screws are the equivalent to applicant's claimed "detents".

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
